The Nebraska Cattlemen have just announced that staff used for the organization. Further, employee education for field staff will be mandatory as part of their strategic plan. The bureau said that its objective is to strengthen its relationships for the agricultural community throughout Nebraska.

Biodiesel is another important biofuel which supports the state's soybean farmers and provides health benefits to the general public. Biodiesel is a clean-burning fuel made from recycled cooking oils and animal fats, which reduces emissions when used in their vehicles. This fuel is also a significant source of fuel made from soy oil as it contains 6% to 20% energy from the soybean crop, which supports the American economy.

Throughout June, follow the Nebraska Cattlemen on Facebook, the Nebraska Ethanol Board, the Nebraska Ethanol Board and Renewable Fuels Nebraska Facebook for additional facts and statistics on ethanol and biodiesel. "This campaign is designed to feature the role these fuels play in our daily lives. We will also feature resources that raise awareness and inform and educate the public on the benefit of biodiesel fuels," said Gene Geering, chairman of the Nebraska Ethanol Board and farmer from Columbus. "Not only will biodiesel add 65 cents per bushel to the value of soybeans, but it also helps livestock producers. This advanced biofuel is responsible for over 60,000 jobs.

Consumers looking for higher ethanol blends can visit getethanol.com or UNLcom. Biodiesel information and locations can be found at biodieselNE.com and biodiesel.org.

The Nebraska Cattlemen's leadership and staff used for the organization. Further, employee education for field staff will be mandatory as part of their strategic plan. The bureau said that its objective is to strengthen its relationships for the agricultural community throughout Nebraska.
