Quote: "Sometimes, burning bridges isn't a bad thing. It prevents you from going back to a place you should never have been to begin with." Unknown

Be Kind, Rewind - This phrase harkens back to the days of VHS tapes when people were encouraged to rewind their rentals before returning them to the video store. With the advent of digital streaming and the decline of physical media, this saying has become irrelevant in the modern age.

Don't Touch That Dial - This expression comes from the era of television sets with dials, where viewers were encouraged to stay tuned to a particular channel. As remote controls and digital interfaces have become the norm, this saying no longer carries the same significance.

You Sound Like a Broken Record - This phrase originated when a vinyl record would skip, causing a repeated sound or phrase. As vinyl records have been largely replaced by digital music formats, this saying has become less relevant and less understood by younger generations.

Dialing a Phone Number - This saying comes from the era of rotary phones, where users would literally dial numbers to make a call. With the prevalence of touchscreens and smartphones, this expression has become outdated and unfamiliar to many. Hang up the phone is another.

Roll Up the Window - This phrase refers to manually rolling up a car window using a crank handle. As most modern cars now have automatic, button-operated windows, this saying has lost its relevance for many

people.

Developing a Film - This expression comes from the days of film cameras when photographs needed to be developed in a darkroom or at a photo lab. With the widespread use of digital cameras and smartphones, this process has become largely obsolete.

Get Off Your High Horse - This old saying, which means to stop acting arrogantly, originates from a time when people of higher social status would ride taller horses. While the meaning of the phrase still holds, its literal connection to horse-riding is less relevant today.

Put a Sock In It - This expression, which means to be quiet or stop talking, comes from the days when people would put a sock in the horn of a gramophone to muffle the sound. As gramophones have become antiquated, this saying has also lost its immediate relevance.

Carbon Copy - This term, used to describe an exact duplicate, originates from the use of carbon paper to create multiple copies of a document. With the advent of digital communication and photocopying, this saying has become less prevalent and less understood by modern audiences.

Take a Long Walk off a Short Pier - This old saying, essentially telling someone to get lost or go away, originated when piers were commonly used for leisurely strolls. Although the phrase's meaning is still understood, its connection to piers and leisure activities is less relevant today.

Straight from the Horse's Mouth - This expression, meaning to get information from a reliable source, comes from the practice of examining a horse's teeth to determine its age and health. As horses are no longer a primary mode of transportation, this saying has become less immediately relatable for many people.

Hung Out to Dry - This phrase, which means being abandoned or left

J.R. Trumbull

without support, stems from the practice of hanging laundry out to dry. While the expression's meaning still holds, the imagery of hanging laundry has become less prevalent with the widespread use of clothes dryers.

A Picture is Worth a Thousand Words - This saying, which emphasizes the power of visual imagery, originated in an era when photographs and images were more scarce. Although the expression's message still rings true, the abundance of digital imagery in modern life has somewhat diminished its impact.

Hold Your Horses - This old expression, which means to be patient or wait, comes from the days when people traveled primarily by horse-drawn carriages. While the phrase is still understood, its connection to horse travel has become less relevant in today's world of modern transportation.

Fit as a Fiddle - This saying, which means to be in excellent health or good shape, originates from a time when the fiddle was considered the epitome of precision and craftsmanship. Although the expression still conveys a positive message, the connection to the fiddle is less familiar to many people today.

Heavens to Betsy - This old exclamation of surprise or shock has unclear origins, but it likely dates back to a time when using a proper name was considered more polite than invoking religious terms. As language has evolved and become less formal, this saying has grown less relevant and recognizable.

Saved by the Bell - This phrase, meaning a last-minute rescue or escape, originally referred to a bell that could be rung by people mistakenly buried alive to signal for help. Although the expression is still used metaphorically, its connection to this historical practice is largely unfamiliar to modern audiences.

### WIND

Ever changing, calm or tempest,  
Quiet zephyr or raging gale,  
Without it life would be stagnant  
But spare us if it's with snow or hail!

In the Sandhills, it pumps water,  
Supplies our livestock with their needs.  
Grass grows stronger with the challenge,  
Stirs the sand among its deeds.

Wind has its place within nature  
As the weather patterns shift.  
Pollination sometimes requires it  
As do other things that drift.

Life without it would be so boring.  
A nice summer breeze feels so nice.  
Let's just forget about the blizzards  
And strong winter winds like ice!
